

sub-comment #	resolution	will be done by	Done?		
1	n/a	n/a	n/a	commented on issue	
2	Fixed in branch	YesCT	done		
3	Minimally, add inline comment above title_context and title_attributes explaining what they are in \$defaults	YesCT	done		
4	n/a, but fixing to use String::format anyway, issue pervasive in HEAD. could use own minor cleanup issue. with #18	YesCT	done	no core issue created	
5	wontfix. MenuLinkDefault is better than StaticMenuLink since a) if you don't provide a class it's the default b) it's parallel with other menu plugin things: Drupal\Core\Menu\LocalActionDefault, Drupal\Core\Menu\LocalTaskDefault	pwolanin	n/a	commented on issue	
6	followup issue	YesCT	done	issue posted on issue	
7	this is related/same as 6 - post comments in the follow-up	YesCT	done	issue posted on issue	
8	file a followup for this and all similar throw new PluginException(). no @todo needed.	YesCT	done	issue posted on issue	2302805
9	add comment/@todo on step that adds the example to update this docblock   comment on issue saying we will do that in Part X?	pwolanin, now YesCT	done	adding todo w issue	2302849
10	just fix using something very similar to the suggestion	xjm	done		
11	no fix needed: hidden etc are loaded and saved from the storage as ints. only in MenuLinkInterface do we have boolean method return values.	n/a	n/a	dawehner commented on issue	
12	Just fix	YesCT	done		
13	Just fix	YesCT	done		
14	Just fix	YesCT	done		
16	Add inline comment saying we want NULL to be empty string because reason	YesCT	done		
17	file followup and add @todo inline	YesCT	done		
18	Just use String::format() with #4	YesCT	done		
19	Just fix	xjm	done		
20	change doc to "managing menu links and storing their definitions". updateDefinition *is* also called on discovered links, so it should not be described as specific to non-discovered links - maybe mention this? .	xjm, pwolanin	done	fixed first part; rest needs to be addressed	
21	no - the overrides thing is implementation-specific, not for the interface	n/a	n/a		
22	if the route didn't have the needed parameters, you get a fatal in the UrlGenerator or AccessManager (which calls the UrlGenerator in checkNamedRoute()) and will throw a MissingMandatoryParametersException. So, nothing to do here it's handled at the time the parameters are needed	pwolanin	done	comment posted	
23	Just fix	xjm	done		
24	leave as is - I don't think other plugin managers have more specific exceptions	n/a	n/a		
25	leave as is	n/a	n/a		
26	n/a	n/a	n/a		
27	Just fix	YesCT	done		
28	Just fix	YesCT	done		

sub-comment #	resolution	will be done by	Done?		
Comment 37	add an inline comment explaining what title_context and title_arguments are, like there already is for the other definition	daweher	done		

link:	<a href="https://www.drupal.org/node/2301239#comment-8965075">https://www.drupal.org/node/2301239#comment-8965075</a>			
sub-comment #	resolution	will be done by	done?	
1	Just fix -- add the word menu to the docblock	xjm	done	
2	Add the @see	dawehner	done	
3	move code comment into purgeMultiple(), clarify if needed to refer to manager instead of controller	xjm + dawehner	done	
4	leave alone: a similar bit of code is in the SQL cache back-end, and other places. I don't think it's worth bending over backwards to make something "generic" for this trivial logic which is similar but slightly different in the places it exists	dawehner	done	filed a followup i
5	A link can be saved to 1 menu or moved from 1 menu to a second menu as part of the save. So at most 2 menus were affected by the operation. Guess that's not obvious, so expand the comment more?	xjm	done	
6	Add comment that we call asort because we want to be sure the parameters are always in the same order when we call UrlHelper::buildQuery()	dawehner	done	
7	"Boolean" should be capitalized	dawehner	done	
8	expand comment? moves the children so they are re-located in the hierarchy underneath where the parent was re-located		done	
9	n/a	n/a	n/a	
10	Add @todo/followup to loadMultiple() to look in \$this->definitions first, and for load() and loadMultiple() to populate the defintions also with any new ones loaded	dawehner	done	
11	expand the one-line summary here for loadFullMultiple() to have the same clarification loadFull() does that it's all table fields, not just those in the definition	xjm	done	
12	Just fix	dawehner	done	
13	Just fix	dawehner	done	
14	Just fix	dawehner	done	
15	<del>add a @todo comment and followup to consider a more efficient hard-coding the list instead of building it form the schema at run time</del>	dawehner	done	comment remov
16	Add another line explaining what the storage is	dawehner	done	
17	Same as 35.22	n/a	n/a	
18	It's a tree with each vertex as an array with certain expected keys and values. Guess we should expand one of these docs to specify it	dawehner	done	
19	Add example array?	dawehner	done	
20	Just fix	dawehner	done	
21	Just fix	dawehner	done	
22	Just fix	dawehner	done	

<b>comment:</b>	<a href="https://www.drupal.org/node/2301239#comment-8965167">https://www.drupal.org/node/2301239#comment-8965167</a>		
<b>sub-comment #</b>	<b>resolution</b>	<b>will be done by</b>	<b>done?</b>
1	n/a	n/a	n/a
2	Same followup as #35.6-7	YesCT	Done
3	Add "Needs tests" and note in summary to... step 4? or 3? nope. tests added here. great.	dawehner	done
4	Just fix	dawehner	done
5	Just fix	dawehner	done
6	n/a	n/a	n/a
7	n/a	n/a	n/a
8	Comment is outdated - remove or change it. We now *do* save them and also use them on monolingual sites	dawehner	done
9	n/a	n/a	n/a
10	This text is cruffy. -1 isn't used, so take that out	xjm, dawehner	done
11	n/a	n/a	n/a
12	fix this to properly inject like e.g. ShortcutAccessController	dawehner	done
13	n/a	n/a	n/a
14	use String::format(), generic exception is ok, nothing else to do. actually, using format and showing ID and UUID. if other exception, can be part of issue from #35 8	YesCT	done
15	Just fix	dawehner	done
16	n/a	n/a	n/a
17	getInfo() needs to go away now, and be updated for: <a href="https://www.drupal.org/node/2301125">https://www.drupal.org/node/2301125</a>	dawehner	done
