Meta tags creation options	

Meta tags creation options

Certains moteurs de recherche punissent les sites qui utilisent les mêmes balises meta sur des pages différentes. Décochez cette option si vous souhaitez supprimer la répétition des mêmes balises meta sur des pages utilisant une pagination (si décochée, Drupal affichera les balises meta seulement sur la première page et non les suivantes. Si vous n'êtes pas sûr(e), sélectionnez cette option.

Utiliser les balises meta de la page d'accueil

Check this option if you want to use the **meta tags for the front page** even if the **default front page** specified is a view, panel or node - in this case, the meta tags specified for the view, panel or node will be ignored. If you want to use the meta tags of the view, panel or node instead, uncheck this option. If unsure, select this option and specify the meta tags you want on the **meta tags for the front page**.

Maximum meta tags length : *

350

The maximum length to use for the meta tags form fields.

— ▶ Taxonomie

Base URL :

Enter the base URL that will be used for canonical URLs.

First keywords :

Enter a comma separated list of keywords that will be always added to each page, and before any other keywords.

Last keywords :

Enter a comma separated list of keywords that will be always added to each page, and after any other keywords.

Meta tag ROBOTS for lists :

- NOARCHIVE
- NOFOLLOW
- NOINDEX
- NOODP
- NOSNIPPET
- NOYDIR

The value to use for the meta tag ROBOTS for the pages that use a pager; this setting is not used for the first page of the list, or when the option to repeat the meta tags for all the pages in the same list is selected.

Default Values

Balises Meta Paramètres Default and specific meta tags

Default values Error 403 page Error 404 page Page d'accueil Other pages

On this page you can enter the default values for the meta tags of your site.

Résumé :

Enter a short abstract. Typically it is one sentence.

Copyright :

Enter a short copyright statement.

Description :

Enter a description. Limit your description to about 20 words, with a maximum of 350 characters. It should not contain any HTML tags or other formatting.

 **Mots-clés :**

Enter a comma separated list of keywords. Avoid duplication of words as this will lower your search engine ranking.

Revisit after :

5 day(s)

The meta tag REVISIT-AFTER defines how often a search engine or spider should come to your website for re-indexing. This tag is used for websites that change their content on a regular basis. This tag can also be beneficial in boosting your rankings if search engines display results based on the most recent submissions.
