

Hi Jim,
the change successfully put the secondary link (Αρχική σελίδα) below the nice menu (2) (videos mp3). Worked in ff3 and chrome (not on ie8). But what i want to do was to place nice menu (2) next to nice menu (1). What do I need to change in the suckerfish.css (or elsewhere) to make this happen? Thx again!

What I wanted to do was, to get this nice menu (2) here, next to nice menu (1)
