

It appears you are working in the "master" branch in git. You should really be working in a version specific branch. The most direct documentation on this is [Moving from a master branch to a version branch](#). For additional resources please see the documentation about [release naming conventions](#) and [creating a branch in git](#). Review of the master branch:

Run [coder](#) to check your style, some issues were found (please check the [Drupal coding standards](#)):

Severity minor, Drupal Commenting Standards, Internationalization, Drupal Security Checks, Drupal SQL Standards, Drupal Coding Standards

sites/all/modules/pareview_temp/test_candidate/taxo_faceted_navigation.module:

```
+52: [minor] indent secondary line of comment one space
+52: [minor] Format should be * Implements hook_foo().
+53: [minor] indent secondary line of comment one space
+473: [normal] missing space after comma
+523: [normal] missing space after comma
+554: [normal] else statements should begin on a new line
+586: [normal] missing space after comma
+602: [normal] else statements should begin on a new line
+767: [normal] else statements should begin on a new line
```

Status Messages:

Coder found 1 projects, 1 files, 6 normal warnings, 3 minor warnings, 0 warnings were flagged to be ignored

[Drupal Code Sniffer](#) has found some code style issues (please check the [Drupal coding standards](#)):

Lines in README.txt should not exceed 80 characters, see the [guidelines for in-project documentation](#).

Remove "version" from the info file, it will be added by drupal.org packaging automatically.

./taxo_faceted_navigation.module: all functions should be prefixed with your module/theme name to avoid name clashes. See <http://drupal.org/node/318#naming>

```
function get_blocks($arr_index_no) {
function get_selected_filters() {
