## Summary

There are 17 gems installed:

[addressable](#), [breakpoint](#), [bundler](#), [chunky\\_png](#), [color-schemer](#), [compass](#), [compass-aurora](#), [compass-blend-modes](#), [compass-normalize](#), [css\\_parser](#), [fssm](#), [rubygems](#), [sass](#), [sassy-buttons](#), [sassy-strings](#), [singularitygs](#), [toolkit](#).

## Gems

**addressable 2.3.5** [\[rdoc\]](#) [\[www\]](#) - depends on [launchy](#), [rake](#), [rspec](#).  
URI Implementation

**breakpoint 2.0.6** [\[rdoc\]](#) [\[www\]](#) - depends on [compass](#), [sass](#).  
An easy to use system for writing and managing media queries.

**bundler 1.3.5** [\[rdoc\]](#) [\[www\]](#) - depends on [ronn](#), [rspec](#).  
The best way to manage your application's dependencies  
Executable is bundle.

**chunky\_png 1.2.8** [\[rdoc\]](#) [\[www\]](#) - depends on [rake](#), [rspec](#).  
Pure ruby library for read/write, chunk-level access to PNG files

**color-schemer 0.2.5** [\[rdoc\]](#) [\[www\]](#) - depends on [compass](#), [compass-blend-modes](#).  
Create color schemes with ease.

**compass 0.12.2** [\[rdoc\]](#) [\[www\]](#) - depends on [chunky\\_png](#), [fssm](#), [sass](#).  
A Real Stylesheet Framework  
Executable is compass.

**compass-aurora 3.0.8** [\[rdoc\]](#) [\[www\]](#) - depends on [bundler](#), [compass](#), [compass-normalize](#), [css\\_parser](#), [sassy-buttons](#), [toolkit](#).  
The companion gem for the Drupal Aurora base theme.

**compass-blend-modes 0.0.2** [\[rdoc\]](#) [\[www\]](#) - depends on [compass](#).  
Using standard color blending functions in Sass.

**compass-normalize 1.4.3** [\[rdoc\]](#) [\[www\]](#) - depends on [compass](#).  
A compass plugin for using normalize.css

**css\_parser 1.3.4** [\[rdoc\]](#) [\[www\]](#) - depends on [addressable](#).

Ruby CSS parser.

**fssm 0.2.10** [\[rdoc\]](#) [\[www\]](#) - depends on [rake](#), [rspec](#).

File System State Monitor

**rubygems 2.0.6** [\[rdoc\]](#) [\[www\]](#)

RubyGems itself

Executable is gem.

**sass 3.2.10** [\[rdoc\]](#) [\[www\]](#) - depends on [maruku](#), [yard](#).

A powerful but elegant CSS compiler that makes CSS fun again.

Executables are sass, sass-convert, scss.

**sassy-buttons 0.2** [\[rdoc\]](#) [\[www\]](#) - depends on [bundler](#), [rake](#).

Easily create awesome CSS only buttons with compass

**sassy-strings 0.3.1** [\[rdoc\]](#) [\[www\]](#) - depends on [compass](#).

Advanced String handling for Sass

**singularitygs 1.1.2** [\[rdoc\]](#) [\[www\]](#) - depends on [breakpoint](#), [compass](#), [sass](#).

Singularity is a fluid grid system that can generate uniform columns as well as asymmetric and compound grids. It is designed to be extensible, adding additional outputs or grid generators are easy, and the core syntax is simple to build upon for custom input syntaxes.

**toolkit 1.3.7** [\[rdoc\]](#) [\[www\]](#) - depends on [breakpoint](#), [color-schemer](#), [compass](#), [sassy-strings](#), [singularitygs](#).

Progressive Enhancement and RWD toolkit of awesomeness

[\[Validate\]](#)
